

PowerSeries™ : Completely Secure

DSC®

- ▶ Protect family & property
- ▶ Save on insurance
- ▶ Increase real estate value

Imagine a security and fire alarm system that offers the most advanced protection for people and possessions. It can alert you when children return from school, distinguish pets from intruders, adjust lighting, heating and air conditioning, and minimize the chance of false alarms. Imagine a system that provides convenience, comfort and dynamic control. That's PowerSeries from DSC.

advanced, award-winning technology

This year, last year and for decades, our digital security, fire alarm products and advanced internet communicators have won multiple awards at major security industry shows.

Our engineers created the first microprocessor-based control panels and set the industry standards for small elegant keypads and wireless devices.

We also achieved key engineering innovations in monitoring station technology. For many years DSC has been the brand of choice among security companies and homeowners in 140 countries worldwide.

save on insurance & add value to your home

By adding a DSC security system to your home, not only will you have taken steps to protect your family and property, but you will also save between 5% and 20% on your annual insurance premium and will increase the value of your home on the housing market.

legendary reliability & protection

Whether you need a traditional security system for burglary and fire, or a more sophisticated system that can transmit video images and send vital information via the internet, DSC has a reliable security solution for you.

check on family or automate your home from afar

Need tighter control from outside your home or even from the other side of the globe? With our home automation features you are never far away.

If you want to control your alarm system from a wireless key, PDA, remote telephone or remote computer, you need DSC.

If you want to regularly check activity in your home and stay connected with your children, nannies, elderly relatives or intruders, you need DSC.

If you want to add controls for home entertainment, lighting, temperature, internet and a variety of other home systems, you need DSC.

easy to understand, even easier to use

Our customers all over the world tell us that we have been successful because DSC systems are among the easiest for homeowners to understand and use.

You can choose to protect your home with the push of a single button. You can even provide different codes for family members, visitors and trades people. Your DSC installer can teach the entire family to use the system in just a few minutes.

stylish & unobtrusive

Designed for contemporary architecture, PowerSeries offers a variety of system controls that can blend into your surroundings or make a design statement on their own. Our newest PK series keypads (available with built-in wireless receivers) feature modern contoured styling, backlit ergonomic buttons and are arranged with universally recognized ICONS for quick action in an emergency.

Our smaller 5511 series keypads are ideal for economic installations or for use as a second keypad at the back door or in your garage.

For the ultimate in convenience and elegance, select our touchscreen model which simplifies arming, disarming and other everyday functions through the easy-to-use touchscreen display.

PowerSeries™ : Completely Secure

new PowerSeries keypads & touchscreens

Power and control are in your hands with eight wired PK series keypads including LCD versions with messages, ICON fixed message and eight and 16 zone easy-to-read LED keypads. For special installations consider our stunning touchscreen, and for economical and secondary usage, why not use our 5511 series.

new PowerSeries control panels

The brain that powers your security system is the control panel. Already a world leader for decades, PowerSeries control panels were recently reinvented for a changing security landscape and the conveniences of home automation.

wireless components

The convenience and flexibility of wireless components add value to any DSC security package. These multi-purpose wireless devices can be used to arm/disarm security systems from a distance, be programmed to trigger garage door openers or activate a panic alarm.

video & two-way audio

Upon transmission of an alarm, DSC video and audio verification modules provide you and your family with video or two-way, talk/listen-in audio functionality with the monitoring station operator through a combination of cameras, microphones and speakers installed in your home.*

** Requires an account with an authorized alarm monitoring company*

internet & GSM alarm communications

DSC alarm communicators create fully supervised security solutions between protected premises and monitoring stations.* Simple-to-install T-Link internet alarm communicators (TL300, TL250 and TL150) save you money by taking advantage of your existing network to provide secure communications over a private network (LAN/WAN) or the internet. GSM universal wireless alarm communicators can be used in a backup or primary role and are ideal for those not using a traditional landline (POTS) or are using Voice over IP (VoIP).

** Requires an account with an authorized alarm monitoring company*

smoke, motion & glassbreak detectors

DSC photoelectric smoke detectors provide reliable smoke and fire detection and are designed to reduce false alarms.

DSC motion detectors provide a superior analysis of detected signals through digital processing. Pet owners are protected from false alarms through Vertical Beam Shaping (VBS), a technology that provides pet immunity up to 60 lbs (27 kg). Acuity™ glassbreak detectors feature built-in intelligence that makes them "smart" enough to recognize the sound of breaking glass from other common sounds found in the home.
