tyco

iotega
Safer, Smarter Living

Lifestyle & Comfort
Supports your favorite standard light, thermostat, power sockets, door locks and other connected devices.

Easy Installation
Fast & easy installation which requires limited maintenance.

Works with
Apple HomeKit

The next generation wireless security and automation platform provides your customers with the security they already know and trust, along with the freedom to choose their favorite home automation devices. Generate revenue by providing your customers with the flexibility to start with a security only package and scalability to upgrade to a full security and home automation solution. Nothing offers better piece of mind as users can remotely monitor their home/business, regardless of how tech savvy they are. You will save time and money with iotega as installations are made simple with the latest innovations in wireless networking technology.

Johnson Controls

Secure

- Security enhanced with industry leading PowerG technology designed to reduce operational costs for dealers and provide ultimate reliability for the end user
