

## Sur-Gard SG-SYSTEM I Receiver

*Compact, Efficient, RELIABLE & Cost-Effective Solution  
for Proprietary Monitoring Needs or Smaller Central Stations*

**ISC WEST -- Las Vegas, Nevada, Wednesday, April 1, 2009** – Introducing the SG-System I Receiver – a perfect fit for institutions and businesses that may already do or are looking to carry out in-house monitoring of their security systems. The SG-System I Receiver is also ideal for those smaller central stations that are looking for a receiver with similar functionality to the Sur-Gard System III receiver but do not require its larger capacity.

The SG-System I Receiver offers the smallest footprint of those of its kind but never compromises on its **QUALITY** performance. It allows proprietary applications or central stations to receive alarm via traditional Plain Old Telephone Service (POTS) telephone lines or over an optional IP connection (using DSC's T-Link or GS series of products). A combination of phone line cards and network line cards can be used to create one integrated **FLEXIBLE** monitoring solution. With the ability to accept multiple communication formats from control panels, the amount of physical receivers required can be reduced – saving valuable space and cost-output. And with an easy-to-use interface, programming the SG-System I is simple and fast.

SG-System I uses a number of patented technologies, including ANI and DNIS reception, to help decrease the online time of central monitoring stations, ultimately saving costs for staffing and phone charges. The SG-System I also offers patented Caller ID technology and the industry's fastest response time via patented Automatic Handshake Selection (AHS).

SG-System I features leading security measures such as 128-bit AES encryption to maintain a secure network environment when communicating with DSC IP communicators

DSC designs and manufactures exceptional products that work when it matters most.

For more information on the Sur-Gard SG System I Receiver visit ISC West booth #22001, or online at [www.dsc.com](http://www.dsc.com).
