

PowerSeries Pro provides a scalable security solution with industry-leading PowerG wireless technology that is ideal for commercial applications.

# SO WHY CHOOSE POWERSERIES PRO?

## TRUSTED

Founded in 1979, Tyco | DSC is a trusted global leader in intrusion security, with a proud history of innovation. We introduced the industry's first microprocessor-based alarm panels that set new standards for performance, convenience, and ease-of-use.

Millions of customers around the world use our security systems and the military-grade PowerG wireless technology. We offer solutions for many verticals, including residential, retail, office buildings, warehousing, and manufacturing.

## SECURE

PowerSeries Pro is a leading edge, globally-certified hybrid security solution for medium to large size commercial applications. Not all encryption is created equal. PowerSeries Pro features 128-bit AES encryption on wired BUS, wireless devices, and cellular and IP communication, offering full end-to-end encryption. Also, tampering is prevented with enhanced triple end-of-line resistors and PowerG anti-masking technology.

## PowerG WIRELESS TECHNOLOGY

All the power of wires, without the hassle of wires. No messy installations. No lengthy and costly disruptions. Quick, easy and cost effective.

military-grade encryption

maximized battery life

reduce false alarms

## GROWTH OPPORTUNITIES

PowerSeries Pro provides scalable commercial installations designed to accommodate additional buildings and areas. And add additional functions, such as temperature monitoring and predictive analytics to enhance the user experience.

## INTEGRATION CAPABILITIES

PowerSeries Pro easily integrates with third-party integrations, including Kantech access control, Building Management Software (BMS), and Alarm.com making it ideal for holistic building management.
