

## PowerG Wireless Carbon Monoxide Detector

### Reliable protection against CO exposure

The **PowerG** Wireless Carbon Monoxide (CO) Detector Monitors the CO gas level in residential buildings, and provides early warning before potentially dangerous levels are reached.

## PowerG Wireless Carbon Monoxide Detector

### PG9933

The PowerG Wireless Carbon Monoxide Detector monitors the CO gas level in residential buildings, protecting people from the silent threat of carbon monoxide exposure. Based on a superior CO detection core platform and powered by leading-edge PowerG wireless technology, it delivers proven reliability and exceptional performance.

The detector triggers visual and audio alerts as soon as CO gas is detected, sounding the built-in 85db alarm buzzer, and activating the large flashing LED lights. An alarm is also activated via the security system to notify people in the vicinity and end-users off site.

Certified by strict international standards, this powerful CO detector is compatible with PowerSeries Neo and iotega systems.

#### **PowerG – The power of wires, without the wires**

Cut out the wires and plug in peace of mind with PowerG, the leading wireless security technology for today's homes and businesses.

PowerG offers all the benefits of traditional wired security, without the hassles and vulnerabilities of wires. It makes end users' lives more secure and convenient, and your work more profitable.

Reliable two-way 128-bit AES encrypted communication, and iron-clad protection blocks interference, delivers unparalleled cyber protection and ensures reliable performance with minimum false alarms.

Long-range wireless transmission enables easy and quick wire-free and repeater-free installations; and adaptive transmission stretches time between battery changes.

### Key Benefits

#### **Reliable**

Ensure frontline protection against the silent threat of carbon monoxide poisoning.

- Sophisticated electrochemical sensor to detect harmful levels of CO gas
- Built-in PowerG leading-edge wireless technology
- Certified by stringent international standards

#### **Secure**

Provide early warning of CO gas presence with visual and audio alarm indications and alerts.

- Built-in 85db alarm buzzer and flashing LED alarm
- Audio and visual indicators are activated when CO gas is detected
- Early warnings allow residents to leave the premises and contact emergency services before injury occurs
- Other safety indicators include low battery, tampering, end-of-life for the detector, and test mode

#### **Easy**

Save time and costs with simple installation and maintenance.

- Easy to install, and can be mounted on a wall or ceiling
- Easy testing with auto and manual test buttons to ensure the device is in good working condition
- Programmed to prevent false alarm notifications during test mode
