## Commercial Security System for Education Facilities

Providing security within the educational sector comes with some very unique challenges.  
**But from unique challenges, come unique solutions.**

See how the PowerSeries Pro solution rises to meet the unique needs of educational facilities of any size.

### Campus Size

- Campuses can be huge and PowerSeries Pro leverages the formidable, long-range power of PowerG wireless technology, enabling wireless communication up to 1.2 miles line-of-sight. That's **4 times the range** of traditional wireless range.
- Whether it's classrooms, offices, labs or the cafeteria, PowerSeries Pro can **partition up to 32 areas and 248 zones**.
- Wireless PowerG devices have a **long battery life** which means fewer time-consuming battery changes on a facility as large as a college campus
- Each partition can be controlled with its own keypad giving you the ability to create **flexible arming schedules** for different areas.

### Complete Security Management

- A **single interface monitors all** security including campus maps, remote panel operation and automated actions when the system generates an alarm whether that's for one campus or multiple campuses across a city or the country.
- The system can handle **1,000 users** giving your different tenants the ability to have their own unique codes
- **Best-in-class fire, smoke, CO detectors and sensors** offer a wide range of safety and security protection.
- 128-bit AES encryption which provides **industry-leading cybersecurity** on all of your wireless devices.

### Scheduling

- PowerSeries Pro can **schedule events** by day-of-the-week and time-of-day to accommodate both special functions and simple everyday use.
- **Time-activated arming** ensures that all perimeter doors are secure.

### Integration Capabilities

- Supports multiple **third-party integrations**, such as Kantech access control, Building Management Software (BMS), and Alarm.com
- **Compatible** with a long list of additional security products, the system meshes them together seamlessly

### Incident Response

- Staff can **request help from anywhere** on campus by using wireless transmitters in case of an accident or a threat

### Scalability

- With **up to 40% more on-board power** than the competition, you can add buildings and devices to the system quickly and easily.
