External Temperature Probe for PG9905 Temperature Detector

DSC is pleased to announce the release of an External Temperature Probe used in the PG9905 Temperature Detector. The cable length is 3.5 meters and can be used in applications such as monitoring refrigeration or outdoor temperature. Measurement accuracy remains the same as the internal sensor, which is ± 2.7 °F. Operating temperature range that can be monitored with this probe is between -22°F to 158°F.

PowerSeries Neo is a new ground-breaking comprehensive and versatile hybrid platform suitable for residential through to scalable commercial enterprises.

PowerSeries Neo's revolutionary technology forms the core of this next generation security system, loading it with an unprecedented line-up of features designed to decrease operational costs for dealers while providing ultimate reliability for end users. Further information on the PowerSeries Neo suite of products is available on www.dsc.com.
