## PowerSeries Neo Integrated Communicator Firmware V5.03

### Introduction

DSC is pleased to announce the release of V5.03 firmware for the PowerSeries Neo line of integrated cellular and Internet communicators. V5.03 fixes several items from previous versions to improve functionality.

This firmware can be used with the following PowerSeries Neo communicators:

- 3G2080(R)E V5.0x
- TL2803G(R)E V5.0x
- TL280(R)E V5.0x

### Changes Since Last Version

Behavior	Fix
FTC troubles on systems using supervision in conjunction with alternating test transmission	Periodic Test will be sent successfully to secondary receiver with supervision and alternating test transmission enabled
Extended ITV2 reconnect times for 3 <sup>rd</sup> party integrations after trouble restoration	Adjusted retry intervals to shorten reconnection time

Existing communicators can be updated to the new firmware version by following the steps located at [http://dlshelp.dsc.com/index.php?title=Neo Remote Firmware Upgrade](http://dlshelp.dsc.com/index.php?title=Neo_Remote_Firmware_Upgrade). Note that this will also upgrade the PowerSeries Neo panel and any other modules connected to the system that are not at the latest version. Communicators can also be upgraded locally by following the steps located at:

[http://dlshelp.dsc.com/index.php?title=Local Firmware Upgrade %E2%80%93 IP and GSM Communicators](http://dlshelp.dsc.com/index.php?title=Local_Firmware_Upgrade_%E2%80%93_IP_and_GSM_Communicators) (Note that PowerSeries Neo communicators require a 5-pin PC-Link cable for the local update to be performed).
