

LED5511

Installation Instructions Instructions d'Installation Instrucciones de Instalacion

WARNING: Please refer to the System Installation Manual for information on limitations regarding product use and function and information on the limitations as to liability of the manufacturer.

ATTENTION: Ce manuel contient des informations sur les restrictions concernant le fonctionnement et l'utilisation du produit et des informations sur les restrictions en ce qui concerne la responsabilité du fabricant. La totalité du manuel doit être lu attentivement.

ADVERTENCIA: Este manual, contiene información sobre restricciones acerca del uso y funcionamiento del producto e información sobre las limitaciones, tal como, la responsabilidad del fabricante. Todo el manual se debe leer cuidadosamente.

The Model LED5511 Keypad has been certified by Telefication according to EN50131-1:2006 + A1:2009, EN50131-3:2009 for Grade 2, Class II. Les claviers modèle LED5511 ont été homologués par Telefication conformément à EN50131-1:2006 + A1:2009, EN50131-3:2009 pour Grade 2, Classe II. Los Modelos de Teclado LED5511 fueron certificados por Telefication, según las normas EN50131-1:2006 + A1:2009, EN50131-3:2009 para Grado 2, Clase II.

FCC COMPLIANCE STATEMENT

CAUTION: Changes or modifications not expressly approved by Digital Security Controls could void your authority to use this equipment.

This equipment generates and uses radio frequency energy and if not installed and used properly, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for Class B device in accordance with the specifications in Subpart "B" of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in any residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to television or radio reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient the receiving antenna
- Relocate the alarm control with respect to the receiver
- Move the alarm control away from the receiver
- Connect the alarm control into a different outlet so that alarm control and receiver are on different circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the FCC helpful: "How to Identify and Resolve Radio/Television Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402, Stock # 004-000-00345-4.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

INSTALLATION INSTRUCTIONS

The LED5511 keypad presents system status using LEDs along with symbols and numbers. The keypad can be used on security systems with up to 64 zones. The LED5511 is compatible with the following DSC security systems:

- PC580/PC585
- PC5008
- PC1864
- PC1832
- PC1555/PC1565
- PC50XX
- PC1616

Specifications

- Voltage rating: 12Vdc nominal
- Connects to control panel via 4-wire Keybus
- One keypad zone input
- Current draw: 30mA (standby) / 100mA (maximum)
- Optional tamper version
- Four programmable function keys
- Ready (green) and Armed (red) status lights
- Low temperature sensor
- Dimensions: 75 x 120 x 25mm (W x L x D)
- Weight: 115g
- Temperature range: -10°C to + 55°C
- Relative Humidity: 93% non condensing
- There are no serviceable parts

Installation

Unpacking

The LED5511 package includes the following parts:

- one LED5511 keypad
- one tamper switch
- four mounting screws
- surface tape
- one end-of-line resistor
- one Installation Manual
- three keypad inner door labels

Mounting

You should mount the keypad where it is accessible to designated points of entry and exit. Once you have selected a dry and secure location, perform the following steps to mount the keypad:

1. Remove the keypad backplate by loosening the screw (optional) located at the base of the unit.
2. Secure the keypad backplate to the wall in the desired location. Use the screws provided.
3. To use the keypad tamper, insert the tamper switch supplied into the opening located in the centre of the backplate.
4. For tamper use, try to ensure the backplate is mounted on a smooth, flat surface. If mounting on a rough surface, fasten the enclosed surface tape to the wall to even out the surface area where the tamper will be positioned.
5. Before attaching the keypad to its backplate, complete the keypad wiring as described in the next section.

Wiring

1. Before wiring the unit, ensure that all power (AC transformer and battery) is disconnected from the control panel.
2. Connect the four Keybus wires from the control panel (red, black, yellow and green) to the keypad terminals (R B Y G).
Consult the diagram below:

3. Connect a device - such as a door contact - to the 'Z' terminal of the LED5511. This eliminates the need to run wires back to the control panel for the device. To connect the zone, run one wire from the device to the 'Z' terminal and the other wire from the device to the B (black) terminal. For powered devices, run the red wire to the R (positive) terminal and the black wire to the B (negative) terminal. When using end of line supervision, connect the zone according to one of the configurations outlined in your system's Installation Manual.

Applying Power

Once all wiring is complete, apply power to the control panel:

1. Connect the battery leads to the battery.
2. Connect the AC transformer.

For more information on control panel power specifications, see the control panel Installation Manual.

NOTE: Do not connect the power until all wiring is complete.

Enrolling the Keypad

Once all wiring is complete, you will need to enter a 2-digit number that tells the system the partition and slot assignment of the keypad.

If your system has partitions, you will need to also assign the keypad to a partition (1st digit).

The slot assignment (2nd digit) tells the panel which keypad slots are occupied. The panel can then generate a fault when a keypad supervisory signal is not present. There are eight available slots for keypads. LED5511 keypads are always assigned to slot 1 by default. You will need to assign each keypad to its own slot (1 to 8).

Enter the following at each keypad installed on the system:

1. Enter Installer Programming by pressing [*][8][Installer's Code]
2. Press [000] for Keypad Programming
3. Press [0] for Partition and Slot Assignment

4. Enter a two digit number to specify the partition and slot assignment.

NOTE: If your system does not have partitions, enter [1] for the first digit.

- 1st digit: Enter 0 to 2 for partition assignment (0 = Global Keypad).
- 2nd digit: Enter 1 to 8 for slot assignment.

5. Press the [#] key twice to exit programming.
6. After assigning all keypads, perform a supervisory reset by entering [*][8][Installer's Code][902]. The panel will now supervise all assigned keypads and enrolled modules on the system.

Programming the Function Keys

The Function keys are programmed in sections [000][1]-[4]. By default, the 4 function keys on the keypad are programmed as Stay Arm (03), Away Arm (04), Chime (06), Aux (11). You can change the function of each key on every keypad. Please see your system's Installation Manual for instructions on programming the keys, and a complete list of all the function key options available for your system.

System Icon

The System Icon will be lit if any of three issues are present;

1. Bypass - A zone on your system is bypassed.
To see if a zone is bypassed press *1.
If any number is lit, the corresponding zone is bypassed.
Refer to your system manual for information on bypassing and removing a bypass.
2. Trouble condition - There is a trouble present on the system.
To see if a trouble is present press *2.
If any number is lit, a trouble condition is present.
Refer to your system manual to identify what trouble condition is present.
3. Alarm Memory - There is a zone in alarm memory.
To see if there is a zone in alarm memory press *3.
If any number is lit, the corresponding zone is in memory.
Refer to your system manual for further information.

FAP Keys

- Fire (F Key)
To activate a fire alarm, press and hold keys #1 and #3 simultaneously for 2 seconds.
- Auxiliary (A Key)
To activate a auxiliary alarm, press and hold keys #4 and #6 simultaneously for 2 seconds.
- Police (P Key)
To activate a police alarm, press and hold keys #7 & #9 simultaneously for 2 seconds.

PROGRAMMING WORKSHEETS

[000] Keypad Programming

1. Enter [*][8][Installer's code]
2. Enter [000] to go to keypad programming

[0] Keypad Enrollment

Valid entries are 01-18, e.g. enter [11] for partition 1, slot 1.

1st digit: Enter 0 to 2 for partition assignment (0 = Global Keypad).

2nd digit: Enter 1 to 8 for slot assignment

Default: 11

[1]-[4] Function Key Assignments	[1] Key 1	[2] Key 2	[3] Key 3	[4] Key 4
Defaults	03	04	06	11
	Stay	Away	Chime	[*][5]

NOTE: To assign function keys, please refer to your System's Installation Manual.

INSTRUCTIONS D'INSTALLATION

Le clavier LED5511 indique les états du système à l'aide de symboles et de numéros qu'il fait apparaître sur son afficheur à DEL. Ce clavier peut être utilisé avec des systèmes de sécurité protégeant jusqu'à 64 zones. Le LED5511 est compatible avec les systèmes de sécurité DSC suivants :

- PC580/PC585
- PC5008
- PC1864
- PC1832
- PC1555/PC1565
- PC50XX
- PC1616

Spécifications

- Tension nominale : 12Vcc
- Raccordement au panneau de contrôle via le Keybus à 4 fils.
- Une entrée de zone
- Consommation de courant : 30mA (en veille) / 100mA (maximum)
- Version avec interrupteur antisabotage optionnelle
- Quatre touches de fonctions programmables
- Voyants d'état Prêt (vert) et Armé (rouge)
- Dimensions: 75 x 120 x 25mm (La x La x P)
- Poids: 115g
- Plage de température : -10 °C à + 55 °C
- Humidité relative : 93 % non cond.
- Ne contient aucune pièce réparable

Installation

Déballage

La boîte du LED5511 contient les éléments suivants :

- Un clavier LED5511
- Un commutateur anti-sabotage

- Quatre vis de montage
- Ruban collant
- Une résistance fin de ligne
- Un Manuel d'Installation
- Étiquettes intérieures pour la porte du clavier

Montage

Pour le montage du clavier, choisissez un endroit près du point d'entrée qui est sec, sécuritaire et accessible. Lorsque vous avez déterminé l'emplacement de montage, suivez les étapes suivantes :

1. Retirez la partie arrière du clavier en dévissant la vis (optionnelle) située à la base de l'unité.
2. À l'aide des vis fournies avec l'unité, fixez la partie arrière du clavier à l'endroit choisi.
3. Si l'installation nécessite un commutateur anti-sabotage, insérez-le dans l'ouverture ronde située au centre de la plaque arrière.
4. Pour les utilisations anti-sabotage, essayez de vous assurer que la plaquette arrière est montée sur une surface lisse et plate. Si vous l'installez sur une surface rugueuse, mettez le ruban collant sur le mur afin de lisser la surface sur laquelle le dispositif anti-sabotage sera fixé.
5. Avant de fixer le clavier sur sa plaque arrière, effectuez tout le câblage décrit dans la rubrique suivante.

Câblage

1. Avant de commencer à câbler l'unité, assurez-vous que l'alimentation (transformateur c.a. et batterie) du panneau de contrôle est coupée.
2. Raccordez les quatre fils du Keybus qui proviennent du panneau de contrôle (rouge, noir, jaune et vert) sur les bornes (R, B, Y et G) du clavier. Référez-vous au schéma ci-dessous.

3. Raccordez le dispositif sur la borne 'Z' du LED5511, comme par exemple un contact de porte. Ceci est un bon moyen d'économiser du temps et du câblage en évitant d'avoir à installer un câble entre le panneau de contrôle et le contact de la porte qui se trouve à proximité du clavier. Pour raccorder la zone, installez un câble entre le dispositif et le clavier et raccordez un des fils provenant du dispositif sur la borne 'Z' du clavier et un autre sur la borne B. Si le dispositif doit être alimenté, raccordez le fil rouge à la borne R (positif) et le fil noir à la borne B (négatif).
Si une résistance de fin de ligne doit être utilisée, raccordez la zone en vous conformant à l'une des configurations décrites dans le manuel d'installation du système.

Mise sous tension

Une fois le câblage complété, mettez le panneau de contrôle sous tension.

1. Raccordez les câbles de batterie à la batterie.
2. Branchez le transformateur CA.

Pour de plus amples informations sur les spécifications d'alimentation du panneau de contrôle, référez-vous au manuel d'installation du panneau de contrôle.

NOTE: Ne mettez pas le panneau de contrôle sous tension avant que tout le câblage ait été complété.

Assignment du clavier

Une fois le câblage complété, vous devez entrer un numéro à 2 chiffres qui sert à indiquer au système la partition et l'emplacement de mémoire qui sont assignés au clavier.

Si votre système est divisé en partitions, vous devez également assigner le clavier à une partition (1er chiffre).

L'assignation de l'emplacement de mémoire (2e chiffre) permet d'indiquer au panneau quels sont les emplacements de mémoire dédiés aux claviers qui sont occupés. Le panneau peut ainsi générer une panne de supervision lorsqu'il ne reçoit pas de signal de présence du clavier. Il y a huit emplacements de mémoire pour les claviers. Les claviers LED5511 sont toujours assignés par défaut à l'emplacement de mémoire 1. Vous devez assigner chaque clavier à un emplacement de mémoire (1 à 8).

Entrez ce qui suit pour chacun des claviers qui est installé dans le système.

1. Accédez au mode de programmation de l'installateur en entrant [*][8][code de l'installateur].
2. Entrez [000] pour accéder à la programmation du clavier.
3. Appuyez sur [0] pour accéder à l'assignation de la partition et de l'emplacement de mémoire du clavier.
4. Entrez le numéro à deux chiffres qui représente la partition et l'emplacement de mémoire.
NOTE: Si votre système n'est pas divisé en partitions, entrez [1] comme premier chiffre.
1er chiffre: Entrez 0 à 2 pour accéder à l'assignation de la partition (0 = clavier global).
2e chiffre: Entrez un chiffre de 1 à 8 pour indiquer l'emplacement du clavier.
5. Pour quitter le mode de programmation, appuyez deux fois sur [#].
6. Une fois tous les claviers assignés, exécutez une réinitialisation de la supervision en entrant [*][8][code de l'installateur][902]. Le panneau supervisera dorénavant tous les claviers et les modules qui ont été assignés dans le système.

Programmation des touches de fonction

La programmation des touches de fonction s'effectue dans les sections [000][1]-[4]. Par défaut, les quatre touches de fonction du clavier sont programmées comme suit: armement en mode à domicile (03), armement en mode Absent (04), Carillon (06), fonction Auxiliaire (11). Vous pouvez modifier la fonction de chacune des touches de chacun des claviers. Pour de plus amples informations sur la programmation des touches de fonction et pour obtenir une liste complète de toutes les options pour les touches de fonctions qui sont disponibles pour votre système, veuillez vous référer au manuel d'installation.

État du système

L'icône du système s'allume dans l'un des trois cas suivants :

1. Suspension - Une zone de votre système est suspendue.
Pour voir si une zone a été suspendue, appuyez sur *1.
Si un chiffre est allumé, la zone correspondante est suspendue.

Pour de plus amples renseignements sur l'activation et la désactivation d'une suspension, consulter le manuel de votre système.

2. Problème - Il y a un problème sur le système.
Pour voir s'il y a un problème, appuyez sur *2.
Si un chiffre est allumé, il y a un problème.
Consulter le manuel de votre système pour déterminer où est le problème.
3. Mémoire d'alarmes - Une zone est dans la mémoire d'alarmes.
Pour voir si une zone est dans la mémoire d'alarme appuyez sur *3.
Si un chiffre est allumé, la zone correspondante est en alarme.
Pour de plus amples renseignements, consulter le manuel de votre système.

Touches FAP

- Feu (Touche F)
Pour déclencher une alarme incendie, appuyer sur les touches 1 et 3 simultanément pendant 2 secondes.
- Auxiliaire (Touche A)
Pour déclencher une alarme auxiliaire, appuyer sur les touches 4 et 6 simultanément pendant 2 secondes.
- Police (Touche P)
Pour déclencher une alarme auxiliaire, appuyer sur les touches 7 et 9 simultanément pendant 2 secondes.

FEUILLES DE PROGRAMMATION

[000] Programmation du clavier

1. Entrez [*][8][code de l'installateur].
2. Entrez [000] pour accéder à la programmation du clavier.

[0] Assignation du clavier

Les entrées valides sont de 01 à 18. Par exemple, entrez [11] pour la partition 1, emplacement de mémoire 1. Par défaut = 11.

1er chiffre:Entrez 0 à 2 pour accéder à l'assignation de la partition (0 = clavier global).

2e chiffre:Entrez un chiffre de 1 à 8 pour indiquer l'emplacement du clavier.

Défaut: 11

[1] à [4] Assignation des touches de fonction

Défaut :	[1] Touche 1	[2] Touche 2	[3] Touche 3	[4] Touche 4
	03	04	06	11
	À domicile	Absent	Carillon	[*][5]

NOTE: Pour de plus amples informations sur l'assignation des touches de fonction, référez-vous au manuel d'installation du panneau de contrôle.

INSTRUCCIONES DE INSTALACION

El teclado LED5511 muestra el estado del sistema usando una pantalla tipo LED la cual incluye símbolos y números. El teclado puede ser usado en sistemas de seguridad de hasta 64 zonas. El LED5511 es compatible con los siguientes sistemas de seguridad DSC:

- PC580/PC585
- PC5008
- PC1864
- PC1832
- PC1555/PC1565
- PC50XX
- PC1616

Especificaciones

- Corriente nominal: 12Vdc
- Se conecta al panel de control mediante el Keybus de 4 conductores
- Una entrada de zona
- Consumo de corriente: 30mA (Normal) / 100mA (máximo)
- Versión con sabotaje opcional
- Cuatro teclas de función programables
- Luces de estado Lista (verde) y Armado (rojo)
- Dimensiones: 75 x 120 x 25mm (A x L x P)
- Peso: 115g
- Rango de temperatura: -10°C a + 55°C
- Humedad relativa: 93%, sin condensación
- No contiene componentes reparables por el usuario

Instalación

Contenido

El conjunto LED5511 incluye las siguientes partes:

- Un teclado LED5511
- Un interruptor de sabotaje
- Cuatro tornillos de montaje
- Tapa de la superficie
- Etiquetas internas para la puerta del teclado
- Un Manual d'Instalacion
- Un resistor de fin de línea

Montaje

Ud. debe instalar el teclado en un lugar que sea fácilmente accesible desde los puntos designados como entrada y salida. Una vez que haya elegido una ubicación segura y libre de humedad, siga los siguientes pasos para el montaje del teclado.

1. Retire la placa posterior del teclado alojando el tornillo ubicado (opcional) en la base de la unidad.

- Fije la placa posterior del teclado a la pared en la ubicación deseada. Utilice los tornillos provistos.
- Si la instalación requiere un interruptor de sabotaje, inserte el interruptor en la apertura redondeada ubicada en el centro de la placa posterior.
- Para el uso de sabotaje, asegúrese de que la placa posterior está montada en una superficie plana y uniforme. Si el montaje se realiza en una superficie accidentada, fije la tapa de la superficie adjunta a la pared para nivelar el área de la superficie en la que se ubicará el sabotaje.
- Antes de montar el teclado en su placa posterior, conecte los cables del teclado según se describe en la sección siguiente.

Cableado

- Antes de comenzar con la conexión de la unidad, asegúrese que toda alimentación (transformador de CA y batería) esté desconectada desde el panel de control.
- Conecte los cuatro cables del Keybus provenientes del panel de control (rojo, negro, amarillo y verde) a los terminales del teclado (R, B, Y, G). Consulte el siguiente diagrama:
- Conecte un dispositivo - tal como un contacto de puerta - a terminal 'Z' del LED5511. Esto elimina la necesidad de tender un cable adicional desde el dispositivo hacia el panel de control. Para la conexión de la zona, conecte un cable desde el dispositivo hasta el terminal Z y el otro cable desde el dispositivo al terminal B (negro). Para dispositivos que necesitan alimentación, conecte el cable rojo al terminal R (positivo) y el cable negro al terminal B (negativo). Cuando se esté utilizando supervisión de fin de línea, conecte la zona de acuerdo a una de las configuraciones descriptas en el Manual de Instalación de su sistema de seguridad.

Conectando la alimentación

- Una vez que se hayan terminado todas las conexiones, conecte la alimentación al panel de control.
 - Conecte los cables de batería a la batería.
 - Conecte el transformador de CA.

Para mayor información acerca de las especificaciones de alimentación del panel de control, consulte el Manual de Instalación del panel de control.

NOTA: No conecte la alimentación hasta que se hayan terminado todas las conexiones del cableado.

Enrolando el teclado

Una vez que se haya conectado todo el cableado, Ud. necesitará ingresar un número de 2 dígitos para indicar al sistema a qué partición y espacio será asignado el teclado.

Si su sistema cuenta con particiones será necesario que asignar el teclado a una partición (1er. dígito).

La asignación de espacio (2do. dígito) indicará al panel cuál espacio ocupará el teclado. De esta forma el panel podrá generar una falla cuando no esté presente una señal de supervisión de teclado. Hoy sólo espacios disponibles para todos. Los teclados LED5511 siempre son asignados al espacio 1 desde fábrica. Será necesario que Ud. asigne cada teclado a su propio espacio (1 a 8). Ingrese lo siguiente en cada teclado instalado en el sistema:

- Ingrese a la Programación del Instalador presionando [*][8][Código de Instalador]
- Presione [000] para Programación de Teclado
- Presione [0] para Asignación de Partición y Espacio
- Ingrese un número de dos dígitos para especificar la asignación de partición y espacio.

NOTA: Si su sistema no posee particiones, ingrese [1] para el primer dígito.

- 1er.dígito: Ingrese 0 a 2 para Asignación de Partición (0 = Teclado Global).
- 2do.dígito: Ingrese 1 a 8 para Asignación de Espacio.
- Presione la tecla [#] dos veces para salir de la programación.
- Luego de asignar todos los teclados, realice un restablecimiento de supervisión ingresando [*][8][Código de Instalador][902]. El panel ahora supervisará todos los teclados asignados y módulos enrolados en el sistema.

Programación del teclas funcionales

Las teclas funcionales se programan en las secciones [000][1]-[4]. De fábrica, las 4 teclas funcionales del teclado están programadas como Armar Presente (03), Armar Ausente (04), Campanilla (06), Auxiliar (11). Ud. puede cambiar la función de cada tecla en cada teclado. Para verificar consulte el Manual de Instalación de su sistema de seguridad para obtener instrucciones para programar las teclas, y una lista completa de todas las opciones de tecla función disponibles en su sistema.

Icono del Sistema

El Icono del Sistema se encenderá si uno de los tres eventos estuviere presentes;

- Inhibición - Una zona en su sistema es inhibida.
 - Para verificar si una zona está inhibida, oprima *1.
 - Si algún número estuviere encendido, la zona correspondiente está inhibida.
- Condición de problema - Hay un problema en el sistema.
 - Para verificar si hay un problema, oprima *2.
 - Si algún número estuviere encendido, existe una condición de problema.
 - Consulte el manual del sistema para verificar cual condición de problema está presente.
- Memoria de Alarma - Hay una zona en la memoria de alarma.
 - Para verificar si hay una zona en la memoria de alarma, oprima *3.
 - Si algún número estuviere encendido, la zona correspondiente está en la memoria.
 - Consulte el manual del sistema para mayores informaciones.

Teclas FAP

- Incendio (Tecla F)
 - Para activar una alarma de incendio mantenga oprimidas las teclas #1 y #3 simultáneamente por 2 segundos.
- Auxilio (Tecla A)
 - Para activar una alarma de auxilio mantenga oprimidas las teclas #4 y #6 simultáneamente por 2 segundos.
- Policia (Tecla P)
 - Para activar una alarma de policía mantenga oprimidas las teclas #7 y #9 simultáneamente por 2 segundos.

FUILLÉS DE PROGRAMMATION

[000] Programación del teclado

- Ingrese [*][8][Código de Instalador]
- Ingrese [000] para acceder a la programación del teclado

[0] Enrolamiento del teclado

Las entradas válidas son 01-18; por ejemplo ingrese [11] para la partición 1, espacio 1. De fábrica: =11

1er.dígito: Ingrese 0 a 2 para Asignación de Partición (0 = Teclado Global).

- 2do.dígito: Ingrese 1 a 8 para la asignación de espacio.

De fábrica: 11

NOTA: Para mayor información acerca de la asignación de tecla funcional, consulte el Manual de Instalación del panel de control.

Limited Warranty
Digital Security Controls warrants that for a period of 12 months from the date of purchase, the product shall be free of defects in materials and workmanship under normal use and that in fulfillment of any breach of such warranty, Digital Security Controls shall, at its option, repair or replace the defective equipment or return of the equipment to be repaired. This warranty applies only to defects in parts and workmanship and not to damage incurred in shipping or handling, or damage due to causes beyond the control of Digital Security Controls such as lightning, excessive voltage, mechanical shock, water damage, or damage arising out of abuse, alteration or improper application of the equipment. The foregoing warranty shall apply only to the original buyer, and is and shall be in lieu of any and all other warranties, whether expressed or implied, and all other obligations or liabilities of Digital Security Controls. Digital Security Controls neither assumes responsibility for, nor authorizes any other person purporting to act on its behalf to modify or to change this warranty, nor to assume for it any other warranty or liability concerning this product. In no event shall Digital Security Controls be liable for any direct, indirect or consequential damages, loss of anticipated profits, loss of time or any other losses incurred by the buyer in connection with the purchase, installation or operation or failure of this product.
Warning: *Digital Security Controls recommends that the entire system be completely tested on a regular basis. However, despite frequent testing, and due to, but not limited to, criminal tampering or electrical damage, it is possible for this product to fail to perform as expected.*
Important Information: *Changes or modifications not expressly approved by Digital Security Controls void the user's authority to operate this equipment.*
IMPORTANT – READ CAREFULLY: DSC Software purchased with or without Products and Components is copyrighted and is purchased under the following license terms:
This End-User License Agreement (“EULA”) is a legal agreement between You (the company, individual or entity who acquired the Software and any related Hardware) and Digital Security Controls, a division of Tyco Safety Products Canada Ltd. (“DSC”), the manufacturer of the integrated security systems and the developer of the software and any related products or components (“HARDWARE”) which You are purchasing.
If the DSC software product (“SOFTWARE PRODUCT” or “SOFTWARE”) is intended to be copy protected by HARDWARE, and is NOT accompanied by new HARDWARE, You may not use, copy or install the SOFTWARE PRODUCT. The SOFTWARE PRODUCT includes computer software, and may include associated media, printed materials, and “online” or electronic documentation. Any software provided along with the SOFTWARE PRODUCT that is associated with a separate end-user license agreement is licensed to You under the terms of that license agreement.
By installing, copying, downloading, storing, accessing or otherwise using the SOFTWARE PRODUCT, You agree unconditionally to be bound by the terms of this EULA, even if this EULA is deemed to be a modification of any previous arrangement or contract. If You do not agree to the terms of this EULA, DSC is unwilling to license the SOFTWARE PRODUCT to You, and You have no right to use it.
SOFTWARE PRODUCT LICENSE
The SOFTWARE PRODUCT is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE PRODUCT is licensed, not sold.
1.GRANT OF LICENSE: This EULA grants You the following rights:
(a)Software Installation and Use - For each license You acquire, You may have only one copy of the SOFTWARE PRODUCT installed.
(b)Storage/Network Use - The SOFTWARE PRODUCT may not be installed, accessed, displayed, run, shared or used concurrently on or from different computers, including a workstation, terminal or other digital electronic device (“Device”). In other words, if You have several workstations, You will have to acquire a license for each workstation where the SOFTWARE will be used.
(c)Backup Copy - You may make back-up copies of the SOFTWARE PRODUCT, but You may only have one copy per license installed at any given time. You may use the back-up copy solely for archival purposes. Except as expressly provided in this EULA, You may not otherwise make copies of the SOFTWARE PRODUCT, including the printed materials accompanying the SOFTWARE.
2. DESCRIPTION OF OTHER RIGHTS AND LIMITATIONS
(a)Limitations on Copying, Reproduction, Distribution and Disassembly - You may not reverse engineer, decompile, or disassemble the HARDWARE as a single integrated product. In this case, the SOFTWARE PRODUCT may only be used with the HARDWARE as set forth in this EULA.
(d)Rental - You may not rent, lease or lend the SOFTWARE PRODUCT. You may not make it available to others or post it on a server or web site.
(e)Software Product Transfer - You may transfer all of Your rights under this EULA only as part of a per-

(f)Termination - Without prejudice to any other rights, DSC may terminate this EULA if You fail to comply with the terms and conditions of this EULA. In such event, You must destroy all copies of the SOFTWARE PRODUCT and all of its component parts.
(g)Trademarks - This EULA does not grant You any rights in connection with any trademarks or service marks of DSC or its suppliers.
3. COPYRIGHT - All title and intellectual property rights in and to the SOFTWARE PRODUCT (including but not limited to any images, photographs, and text incorporated into the SOFTWARE PRODUCT), the accompanying printed materials, and any copies of the SOFTWARE PRODUCT, are owned by DSC or its suppliers. You may not reproduce, copy, distribute, or otherwise use the SOFTWARE PRODUCT. All title and intellectual property rights in and to the content which may be accessed through use of the SOFTWARE PRODUCT are the property of the respective content owner and may be protected by applicable copyright or other intellectual property laws and treaties. This EULA grants You no rights or license in such content. All rights not expressly granted under this EULA are reserved by DSC and its suppliers.
4. EXPORT RESTRICTIONS - You agree that You will not export or re-export the SOFTWARE PRODUCT to any country, person, or entity subject to Canadian export restrictions.
5. CHOICE OF LAW - This Software License Agreement is governed by the laws of the Province of Ontario, Canada.
6. ARBITRATION - All disputes arising in connection with this Agreement shall be determined by final and binding arbitration in accordance with the Arbitration Act, and the parties agree to be bound by the arbitrator’s decision. The place of arbitration shall be Toronto, Canada, and the language of the arbitration shall be English.
7. LIMITED WARRANTY
(a) **NO WARRANTY - DSC PROVIDES THE SOFTWARE “AS IS” WITHOUT WARRANTY, DSC DOES NOT WARRANT THAT THE SOFTWARE WILL MEET YOUR REQUIREMENTS OR THAT OPERATING THE SOFTWARE WILL NOT CAUSE UNEXPECTED OR UNUSUAL RESULTS.**
(b) CHANGES IN OPERATING ENVIRONMENT - DSC shall not be responsible for problems caused by changes in the operating characteristics of the HARDWARE, or for problems in the interaction of the SOFTWARE PRODUCT with non-DSC SOFTWARE or HARDWARE PRODUCTS.
(c) LIMITATION OF LIABILITY: WARRANTY REFLECTS ALLOCATION OF RISK - IN ANY EVENT, IF ANY USER AGREES TO USE THE SOFTWARE PRODUCT, THE USER ACCEPTS THIS LICENSE AGREEMENT. DSC’S ENTIRE LIABILITY UNDER ANY PROVISION OF THIS LICENSE AGREEMENT SHALL BE LIMITED TO THE GREATER OF THE AMOUNT ACTUALLY PAID BY YOU TO LICENSE THE SOFTWARE PRODUCT AND FIVE CANADIAN DOLLARS (USD \$5.00). DSC USES SOME LIMITED LIABILITY PROVISIONS IN THIS LICENSE AGREEMENT. DSC’S ENTIRE LIABILITY UNDER ANY PROVISION OF THIS LICENSE AGREEMENT SHALL BE LIMITED TO THE GREATER OF THE AMOUNT ACTUALLY PAID BY YOU TO LICENSE THE SOFTWARE PRODUCT AND FIVE CANADIAN DOLLARS (USD \$5.00). DSC USES SOME LIMITED LIABILITY PROVISIONS IN THIS LICENSE AGREEMENT.
