

PowerG Wireless Recessed Contact

Residential

Light Commercial

Subtle And Secure Protection

Provide your customers with reliable and discreet window and door protection, with the powerful, embedded **PowerG** Wireless Recessed Contact.

PowerG Wireless Recessed Contact

PG9307

The PowerG Wireless Recessed Contact is a small but powerful device, uniquely devised to meet customers' demand for discreet, yet reliable door and window controls.

With a compact size and white or clear casing, flanges and cap, it can be embedded within the frame of a window or door. To make the contact even less noticeable, the flanges attached to the sensor casing can be easily removed once installation is complete.

User-friendly, the integrated design and ultra-thin magnet (2mm / 0.08in) make the recessed contact quick and easy to install and maintain. Its long battery life of up to 10 years based on typical use reduces maintenance requirements.

PowerG – The power of wires, without the wires

Cut out the wires and plug in peace of mind with PowerG, the leading wireless security technology for today's homes and businesses.

PowerG offers all the benefits of traditional wired security, without the hassles and vulnerabilities of wires. It makes end users' lives more secure and convenient, and your work more profitable.

Ultra-reliable, two-way 128-bit AES encrypted communication, and iron-clad protection that blocks interference, deliver unparalleled cyber protection – ensuring reliable performance with minimum false alarms.

Long-range wireless transmission enables easy and quick wire-free and repeater-free installations; and adaptive transmission stretches time between battery changes.

Key Benefits

Reliable

Provide dependable detection with a powerful, recessed wireless magnet contact.

- Built-in PowerG leading-edge wireless intrusion technology.

- Seamless signal transmission between the contact and the control panel, with two-way communication and a secured protocol.
- Fully certified by the most stringent international standards.

Convenient

Save time and effort on installations and maintenance, with an integrated, durable device.

- Quick and easy installation of the sensor.
- Ultra-thin (2mm / 0.08in) magnet can be installed without drilling.
- Fast and convenient auto-enrollment.
- Long-lasting battery, up to 10 years with typical use under standard conditions.
- Ideal for both residential and light commercial use.
- Part of a complete end-to-end security solution, compatible with PowerSeries Neo and iotega security systems.

Discreet

Keep security subtle with a near-invisible device.

- Compact sensor, barely discernable once installed.
- Clear flanges attached to the sensor blend in with the doorframe, and enable near-invisible installation regardless of the doorframe's color.
- Flanges on the sensor casing can be easily snapped off, to further reduce visual impact.
- White and brown adhesive covers (included) for the cap and magnet can be applied to match the door's surface.
- Sensor casing (67.56 x 19.05mm / 2.66 x 0.75in) is inserted into the side of the door.
