DLS IV v1.51 Software Release - PowerSeries v4.6 Driver Pack

DSC is pleased to announce the release of DLS IV v1.51 and introduce the driver pack for the new PowerSeries v4.6 to support the PC1616, PC1832 & PC1864 panels. New features included in the PowerSeries v4.6 are:

- ✓ 64 Wireless zones using PC1864 and new RFK5564
- ✓ Easy wireless device enrolment process
 - v1.3 of RFK5564 or RFK5500
- ✓ Word Library for programming zone labels
 - Available with v1.3 of RFK5564, RFK5500 or PK5500
 - Available in English, French, Spanish and Portuguese

In addition to the PowerSeries, the following panel/module support has been added:

SCW9057 v1.1X CP01 and Standard
3G2055 v3.01
GS2060-SMv2.0X
GS2055 v2.5X
PK5500 v1.3
RFK5132 v5.4
RFK5164 v5.4

The DLS Updater will prompt when an update available. To update DLS IV select version 1.51 and follow the prompts.
