Introducing PowerSeries Neo Communicators Version 4.1

DSC is pleased to announce the release of the V4.1 firmware for the PowerSeries Neo Alarm Communicators. All cellular (3G2080), internet (TL280) and dual (TL2803G) communicators manufactured starting April 27th, 2015 include the updated version.

New Features

➤ Trouble Suppression

The updated firmware adds a new Trouble Delay feature which allows the installer to delay and/or restrict the local annunciation and central station communication for cellular and Ethernet related troubles. It will also suppress the local annunciation of a loss of supervision trouble.*

***Loss of supervision trouble will still be annunciated at the central station**

➤ Integration Protocol over IP/Cellular

Allows licensed 3rd parties to integrate to the PowerSeries Neo platform over IP/Cellular

The new driver pack for V4.1 Communicators is available in the DLS 5 downloading software.

All part numbers and pricing remain unchanged
