## PowerSeries Neo v1.14

### Introduction

PowerSeries Neo captures the flexibility of a modular, hardwired system with the simplicity of a wide range of wireless and easy to install PowerG-enabled devices and peripherals. The bundled power of PowerSeries Neo is harnessed by distinctive and comprehensive support software to help security professionals significantly cut time and cost invested in the installation.

**PowerSeries Neo** – a new ground-breakingly comprehensive and versatile hybrid platform suitable for residential through to scalable commercial enterprises.

- PowerSeries Neo is available for Global Distribution

PowerSeries Neo's revolutionary technology forms the core of this next generation security system, loading it with features designed to decrease operational costs for dealers while providing ultimate reliability for end users.

### Main v1.14 Features

Main Feature	Customer Benefits	Value
2-way Audio	2-way audio initiated by Central Station [802][603] option 8	New feature is on at default
Placement Test	Display 24 Hour Placement results	DLS 5 will now display placement test results without having to manually view on the system
Supervisory Trouble	Corrected issue with module supervisory troubles being generated and restored immediately.	System will wait longer period of time to generate supervisory troubles
Wireless Siren squawk	Wireless Siren squawks sound arming in progress	Cancelling No Activity Arming and Autoarm Pre-Alert will stop the wireless siren from squawking
Not Networked Trouble	The reporting of Not Networked Trouble will now follow the device supervisory trouble.	Not networked trouble will be limited to power up and enrollment of a device.

# Intrusion
