PG9911B/PG9901 BATT PowerG Wireless Outdoor/Indoor Sirens With A battery

Introduction

DSC announces a change to the design for the PowerG Wireless Indoor and outdoor sirens. With new A-size batteries, the indoor and outdoor sirens can be shipped via air without limitations.

Background

Due to aircraft safety concerns, the updated IATA regulations restrict shipments of Lithium D-size batteries. As such, we had to ship the outdoor and indoor sirens without batteries and send the D-size batteries in a separate safe box.

Scope of Change

- A new pack of A-size batteries was developed for the sirens. The new sirens can be shipped with the batteries inside, without limitations

For PG9911 BATT only

- A RED screw cover was designed to differentiate the new sirens without the need to open the plastic

Market Segments

- Residential, Small Business and Smart Home market segments
- Available to US market

Main Features

Main Features	Customer Benefit	Value
'A' battery type can be shipped with the product	Reduction in order complexity and shipping costs	Avoid confusion and simplify inventory management by reducing to 1 SKU
'A' battery offers 7% improvement in capacity over previous 'D' battery	Longer life-span for the siren battery	Reduce truck rolls for battery replacements

Compatibility

- 'A' battery is specifically designed for use with the new siren and is not compatible with the previous siren using 'D' battery
- Previous 'D' battery will remain available for replacements but is not compatible with sirens that use the 'A' battery

Availability

- DSC Brand
- 915 MHz variants available
- Certifications FCC, IC, UL, ULC, CNC
- English
