Brand: DSC

Profile

We are excited to announce the launch of the WS9LCDWF9 Wireless Arming Station which is part of the iotega safety, security & lifestyle solution. iotega is an all-in-one highly secure and flexible smart security and home automation platform for residential and small commercial properties. Sleek, stylish and compact, it can be placed in any room, blending in nicely with any décor.

You can provide your traditional keypad users with the security they already know and trust. With built-in fully encrypted PowerG wireless technology you have the freedom to install the wire free arming station anywhere you choose, either wall mounted or with an optional desk stand.

The PowerG Wireless Arming Station supports security only functions such as; 2 x 16 full message display, Arm/Disarm, zone bypass, 5 preset function keys, tamper switch, zone status, and multiple language support: English, French, Spanish.
