

Product Change Note - **REVISED**

PowerSeries Neo Communicators v5.42 Release

Date: February 26, 2020
Product: PowerSeries Neo Communicators
Region: North America
Brand: DSC

We are pleased to announce the release of the v5.42 firmware for use with the PowerSeries Neo Alarm communicators. The Improvements made to internal network recovery algorithms to minimize loss of supervision troubles caused by momentary loss of cellular connection. new release includes several enhancements designed to improve security and user experience.

Feature	Description
Supervision	Improvements made to internal network recovery algorithms to minimize loss of supervision troubles caused by momentary loss of cellular connection.
Integration	Corrected an issue which caused delays in establishing an integration connection following an application reset.
Integration	Corrects issue where V5.3+ communicators could not re-establish an integration connection over serial or Ethernet following a

	hardware or software default. * Existing V5.3+ communicators in this state can be recovered by applying this firmware update.
DLS over Ethernet	Eliminates issue where incoming DLS connections over Ethernet following an AC power loss are inhibited until communicator is powered down or sends signal via Ethernet.

Note:

- Firmware is now available via DLS5 to support local and remote firmware updates.
