

New Product Announcement

Universal Commercial Fire LTE Upgrade Kit

Date: March 19, 2020

Product: LE4010CF-ATUPG Universal Commercial
Fire Upgrade Kit

Region: USA

Brand: DSC

SAVE TIME AND COST BY REPLACING ONLY REQUIRED COMPONENTS

Profile

We are pleased to introduce the new LE4010CF-ATUPG LTE Universal Commercial Fire upgrade kit.

Unlike competitive solutions that require replacement of the entire communicator, the LE4010CF-ATUPG allows replacement of only the critical components required to switch from 3G (HSPA) to LTE. In addition, it leverages its power supply, thereby avoiding battery backup calculations for the communicator. The upgrade kit includes everything required to convert existing 3G3070CF and 3G4010CF installations to LTE technology before the February 2022 3G sunset date.

The LE4010CF-ATUPG comes complete with the LE4010CF PCB, LTE antenna and a new AT&T SIM to enable activation with C24 Communications. The new LTE PCB shares the same mounting configuration as the 3G versions to allow re-use of the existing enclosure and power supply, saving you both time and cost on installations.

To find out more about how DSC can help with your 3G to LTE conversion please visit www.dsc.com/lte or contact your local sales representative.

Features, Benefits & Values		
Feature	Benefit	Value
LTE Connectivity	Enable customer's access to all cellular providers after the 3G sunset, ensuring robust connectivity and faster data transmission	Extends the longevity of your recurring monthly revenue
PCB Replacement	Seamless upgrade of existing communicator	Minimizes installation time and cost

Compatibility & Ancillaries

For installations requiring relocation of the antenna to improve/obtain a cellular signal, there are antenna extension kits available; LTE-15ANT, LTE-25ANT, and LTE-50ANT. Note that the existing antenna extension kits (models GS-XXANTX) are not compatible with the LE4000/LE4010 as they do not support the LTE frequencies.

Availability

- Now available for ordering in US
- Certifications: FCC, UL, CFMS
