General Advisory Bulletin

DLS 5 with Alarm.com Multi-Factor

Authentication

Date: May 27th 2021

Region: NA, EMEA, APAC, LATAM

Product: DLS 5
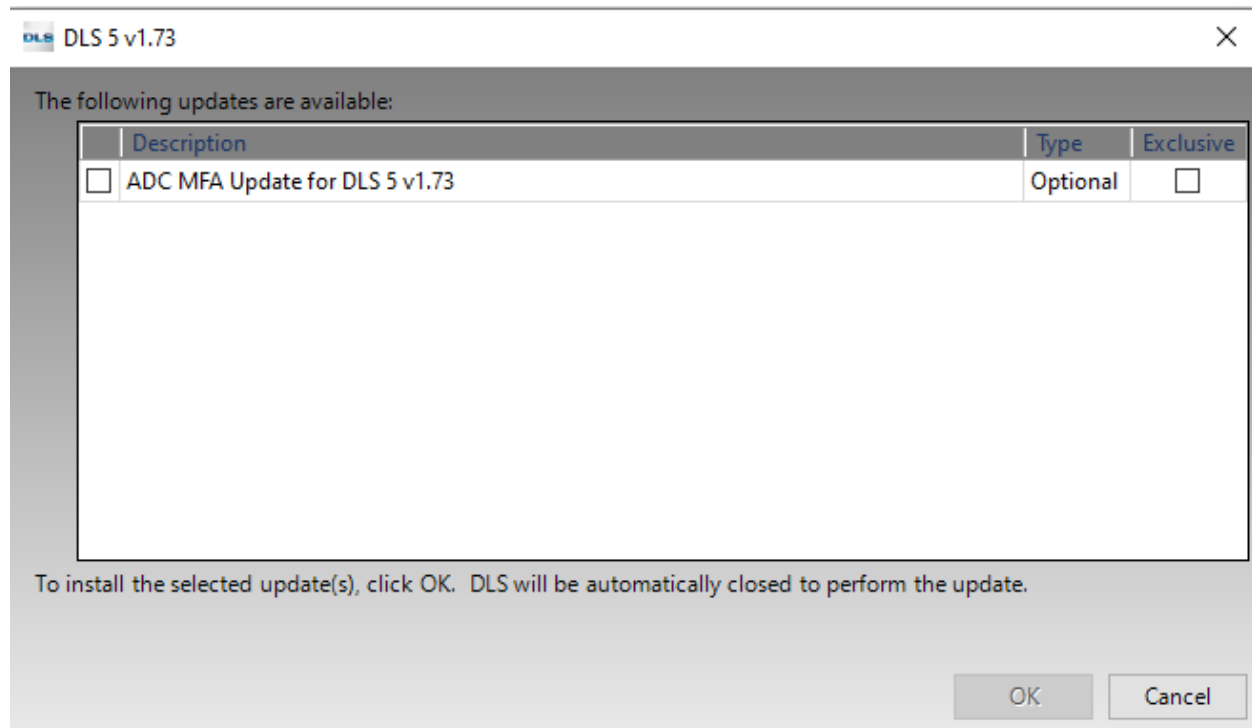

Brand: DSC

Remote programming utility designed for DSC intrusion product configuration and remote diagnostics.

Overview

We are pleased to announce a new driver that will support multifactor authentication when using Alarm.com enabled communicators. To install the driver navigate to "Help", "Updates", and then "Check for updates". At that point select the "ADC MFA Update for DLS5 v1.73" box and follow the installation process.

DLS 5 v1.73		✕
The following updates are available:		

Description	Type	Exclusive
☐ ADC MFA Update for DLS 5 v1.73	Optional	☐

To install the selected update(s), click OK. DLS will be automatically closed to perform the update.

OK   Cancel

To enable Multi-Factor Authentication follow the below steps.

Update the MFA (Multi-Factor Authentication) Key

To enable MFA in DLS for existing accounts, please follow the steps below:

1. Select an account with ADC communicator
2. Right click on the account and select Properties
3. Navigate to the ADC Communicator and select Alarm.com
4. Update the Authentication Key

Once 'Saved' for one DLS account, this key will be updated for all accounts associated for the specified ADC user.

For more information on installations please click here or copy and paste the following link into your browser. http://dlshelp.dsc.com/index.php?title=Main_Page
