

## Product Change Note

### PowerSeries Pro Version 1.32

**Date:** September 8 2021

**Region:** Global

**Product:** PowerSeries Pro

**Brand:** DSC

### Scope

The PowerSeries Pro hybrid intrusion system features PowerG wireless encryption technology and is built with superior onboard power, ideally suited for large-scale projects in factories, warehouses, office buildings, retail, and education facilities.

The **firmware upgrade v1.32** is now available, supporting the compatibility between the PowerSeries Pro panel and the software development kit (SDK) v2.0. The SDK is offered by the JCI Connected Partner Program to the integrators to support the PowerSeries Pro panel in their solutions by providing a common programming interface for the most commonly used features.

## New Features, Benefits & Value

Feature	Benefit	Value
Works with SDK 2.0	Commonly used features of the PowerSeries Pro intrusion panel can be easily integrated by our partners	Explore the benefits of becoming the integration partner: <a href="https://connectedpartnerprogram.partnerproducts.com/">https://connectedpartnerprogram.partnerproducts.com/</a>
Programmable Integration inactivity timeout	Possibility to program the integration inactivity timeout both via the Keypad and via ITv2.	Convenience and time-saving

### Control panel upgrade

You can upgrade previously released control panels (HS3032, HS3128 & HS3248) by using DLS software. The firmware files for the PowerSeries Pro version 1.32 will be available online starting on September 8, 2021. For instructions on how to update the firmware locally or remotely, please click on one of the links below or copy and paste it into a browser:
