

## General Advisory

# DSC SDK v2.0 Connected Partner Program

**Date:** September 3, 2021

**Region:** Global

**Product:** DSC SDK for PowerSeries NEO and DSC PowerSeries PRO

**Brand:** DSC

### Overview

We are happy to announce a new release of the DSC SDK - a tool to integrate select DSC control panels into 3rd party software. The new version of the SDK (v2.0) features an improved architecture, bug fixes as well as the following new features:

- PowerSeries Pro panel support to help serve the needs of larger intrusion projects
- 64-bit encryption for superior cybersecurity
- Event-buffer feature to enable a simplified event-driven notification mechanism

Important: Your panels should be updated to the latest version of firmware available: PowerSeries NEO v1.37 and PowerSeries PRO v1.32

The v2.0 release maintains backward compatibility to the 1.X versions. To upgrade from previous versions current customers can simply download the new version from the [Connected Partner Portal | DSC](#) (partnerproducts.com), change their application references to use the new assemblies, and finally recompile. Also available for download is the complete Technical Release Notes.

### About the Connected Partner Program

The **Connected Partner Program** allows potential technology partners to **integrate** with Tyco's in-house brands such as DSC, Kantech, Software House, Exacq, Illustra, American Dynamics, and CEM Systems. The program brings together our industry-leading security solutions to enable members to market their third-party solutions through all of the Tyco Security Products brands and to leverage our Tyco Security Products sales team, globally.
