Paging

Only one page can be performed at a time. If a conversation is already established another page cannot be performed until the existing conversation is over.

To initiate a page do the following:
Step 1 - Press the Page/Answer button on any interior audio station. The audio station will emit two beeps. All other interior audio stations will emit several rapid beeps. The person performing the page can now be heard on all the interior audio stations.

To answer a page do the following:
Step 1 - Press the Page/Answer button on any other interior audio station. The audio station will beep twice. At this point a private communication link is established between the audio station used to do the page and the audio station that answered.

To end a page do the following:
Step 1 - Press the Page/Answer button on the audio station. When the button is pressed the communication link is terminated.

To cancel a page do the following:
Step 1 - Press the Page/Answer button a second time. If a page was initiated and no one answered the person performing the page can now be heard on the same audio station.

Intercom Background Music

If your system has been set up for intercom background music, then background music can be broadcasted from all interior audio stations which are not in the Do Not Disturb mode. To turn the background music on or off, perform the following from any system keypad:

Step 1 - Press [6].
Step 2 - Enter your Master code.
Step 3 - Press [7] to turn background music on or off.

If both the Monitor feature and the Background Music feature are active at the same time, the Monitor feature will override the Background Music feature.

Paging

The audio station will emit two beeps.

Limitation of Liability

Digital Security Controls Ltd. warrants that for a period of twelve months from the date of purchase, the product shall be free of defects in materials and workmanship under normal use and that in fulfillment of any breach of such warranty, Digital Security Controls Ltd. shall, at its option, repair or replace the defective product or any other parts and labor associated with the equipment, provided that such equipment is returned to Digital Security Controls Ltd. prepaid freight, and is not herein in shipping or handling, or damaged due to causes beyond the control of Digital Security Controls Ltd. such as lightning, excessive voltage, mechanical or water damage, or damage arising out of abuse, alteration or improper application of the equipment. The foregoing warranty shall apply only to the original buyer, and in no event shall be of any and all other warranties, whether expressed or implied and of all other obligations or liabilities on the part of Digital Security Controls Ltd. This warranty contains the entire warranty. Digital Security Controls Ltd. neither assumes, nor authorizes any other person purporting to act on its behalf, expressly or by implication, or to change this warranty, nor to assume for it any other warranty or liability concerning this product.

In no event shall Digital Security Controls Ltd. be liable for any direct or indirect or consequential damages, loss of anticipated profits, loss of time or any other losses incurred by the buyer in connection with the purchase, installation or operation or failure of this product.

The entire system should be fully tested on a regular basis. However, despite frequent testing, and due to, but not limited to, criminal tampering or electrical disruption, it is possible for this product to fail to perform as expected.

FCC COMPLIANCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

• Re-orient the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/television technician for help.

The user may find the following booklet prepared by the FCC useful: "How to Identify and Resolve Radio/Television Interference Problems?" This booklet is available from the U.S. Government Printing Office, Washington D.C. 20402, Stock # 004-000-00345-4.

IMPORTANT INFORMATION

The equipment consists of Part 68 of the FCC Rules. On the side of this equipment is a label that contains, among other information, the FCC registration number of this equipment.

WARNING: Do Not Disturb

The security control panel must be properly connected to the telephone line with a USOC RJ-31X telephone jack.

This equipment must be connected to the telephone network with standard plugs and telephone equipment provided. As such, excessive noise may be transmitted onto the network. The manufacturer neither assumes, nor authorizes any other person purporting to act on its behalf, expressly or by implication, or to change this warranty, nor to assume for it any other warranty or liability concerning this product.

To avoid receiving pages, doorbox calls, monitor or incoming phone calls a station can be put on Do Not Disturb.

To put an audio station on Do Not Disturb do the following:
Step 1 - Press the Do Not Disturb button. The red light on the telephone will come on solid to indicate it is in Do Not Disturb mode.

To take a station off Do Not Disturb do the following:
Step 1 - Press the Do Not Disturb button a second time. The red light on the station will go off and the station will again be able to receive pages, doorbox calls and incoming telephone calls.

To initiate a page do the following:
Step 1 - Press the Page/Answer button on any other interior audio station. The audio station will beep twice. At this point a private communication link is established between the audio station used to do the page and the audio station that answered.

To answer a page do the following:
Step 1 - Press the Page/Answer button on the audio station. When the button is pressed the communication link is terminated.

To cancel a page do the following:
Step 1 - Press the Page/Answer button a second time. If a page was initiated and no one answered the person performing the page can now be heard on the same audio station.

Responding to a Page Without Answering

If your system has been set up to allow responding to a page without answering, all audio stations will be able to communicate with the audio station which initiated the page for 30 seconds without pressing the Page/Answer button to answer.

To respond to a page without answering do the following:
Step 1 - Press the Page/Answer button a second time. If a page was initiated and no one answered the person performing the page can now be heard on the same audio station.

PC5928 User's Instruction

Responding To A Page Without Answering will not work if there is already a page in progress, a telephone call is in progress or if the monitor feature is active.

PC5928 Audio Interface Module

This manual contains information on limitations regarding product use and function and information on the limitations as to liability of the manufacturer. The entire manual should be carefully read.
Doorbell Answer
Your system may have a weather resistant exterior audio station designed for doorbell operation. The exterior audio station has only one button, a Call button. The exterior audio station cannot receive pages, Monitor or receive incoming calls.

To initiate a call from the exterior audio station do the following:

**Step 1 - Press the Call button on the exterior audio station.** All the interior audio stations will make a chime sound. Since there can be more than one exterior audio station on the system there are two different chime sounds available. This will help you identify from which the call is coming.

To answer a doorbell call do the following:

**Step 1 - Press the Page/Answer button on any interior audio station.** The audio station will beep twice. At this point a private communication link is established between the exterior audio station used to perform the call and the audio station that answered.

Responding to a Doorbell Call Without Answering
If your system has been set up to allow responding to a doorbell call without answering, all audio stations will be able to communicate with the doorbell which initiated the page for 30 seconds without pressing the Page/Answer button to answer.

To respond to a doorbell call without answering do the following:

**Step 1 - Once the doorbell tone is heard from the closest station, simply respond without pressing the Page/Answer button.**

To answer a doorbell call after responding hands-free do the following:

**Step 1 - Press the Page/Answer button on the closest audio station to establish a private communication link and allow a duration longer than 30 seconds.**

Paging, Doorbell and Incoming Calls While Monitoring
Your system may have a weather resistant exterior audio station designed for doorbell operation. The exterior audio station has only one button, a Call button. The exterior audio station cannot receive pages, Monitor or receive incoming calls.

To initiate a call from the exterior audio station do the following:

**Step 1 - Press the Call button on the exterior audio station.** All the interior audio stations will make a chime sound. Since there can be more than one exterior audio station on the system there are two different chime sounds available. This will help you identify from which the call is coming.

To answer a doorbell call do the following:

**Step 1 - Press the Page/Answer button on any interior audio station.** The audio station will beep twice. At this point a private communication link is established between the exterior audio station used to perform the call and the audio station that answered.

Responding to a Doorbell Call Without Answering
If your system has been set up to allow responding to a doorbell call without answering, all audio stations will be able to communicate with the doorbell which initiated the page for 30 seconds without pressing the Page/Answer button to answer.

To respond to a doorbell call without answering do the following:

**Step 1 - Once the doorbell tone is heard from the closest station, simply respond without pressing the Page/Answer button.**

To answer a doorbell call after responding hands-free do the following:

**Step 1 - Press the Page/Answer button on the closest audio station to establish a private communication link and allow a duration longer than 30 seconds.**

Answering an Incoming Call While Paging
If a page is in progress when an incoming call is detected the two persons on the page will hear the ringtone. Only the two persons on the page will hear the ringtone. If the other interior audio stations press the Page/Answer button to answer the incoming call, the page will be disconnected and the person who pressed the Page/Answer button will be immediately connected to the incoming call.

Transfer an Answered Call to the In-house Phones
If you have answered a call at the interior audio station, the call can be transferred to an in-house phone.

To transfer the call:

**Step 1 - Pick up an in-house phone and press the [#] key.** When the in-house phone is picked up and a [#] is pressed the phone call will be transferred from the intercom station to the in-house phone.

To hang up the call:

**Step 1 - Simply hang up the phone hand set as you normally would.**

Transferring an Answered Call to the In-house Phones
Once you have answered a call at the interior audio station, the call can be transferred to an in-house phone.

To transfer the call:

**Step 1 - Pick up an in-house phone and press the [#] key.** When the in-house phone is picked up and a [#] is pressed the phone call will be transferred from the intercom station to the in-house phone.

To hang up the call:

**Step 1 - Simply hang up the phone hand set as you normally would.**

User Help
If your system has been setup for User Help, the following steps will allow the Escort5580 Audio Assistant to instruct you through the Audio Interface.

On an LED keypad:
Press and hold the designated Help function key for two seconds. The Audio Help will begin by prompting “HELLO, ......” The station will return to the state it was in before the monitor feature was turned on. Do Not Disturb (Light is ON) or Normal (Light is OFF).

On an LCD keypad:
Press and hold the designated Help function key for two seconds. The Audio Help will begin by prompting “HELLO, ......” The station will return to the state it was in before the monitor feature was turned on. Do Not Disturb (Light is ON) or Normal (Light is OFF).

The volume level of User Help can be adjusted by increasing or decreasing the volume of the Escort5580 Audio Assistant.
