

# ULC-LA

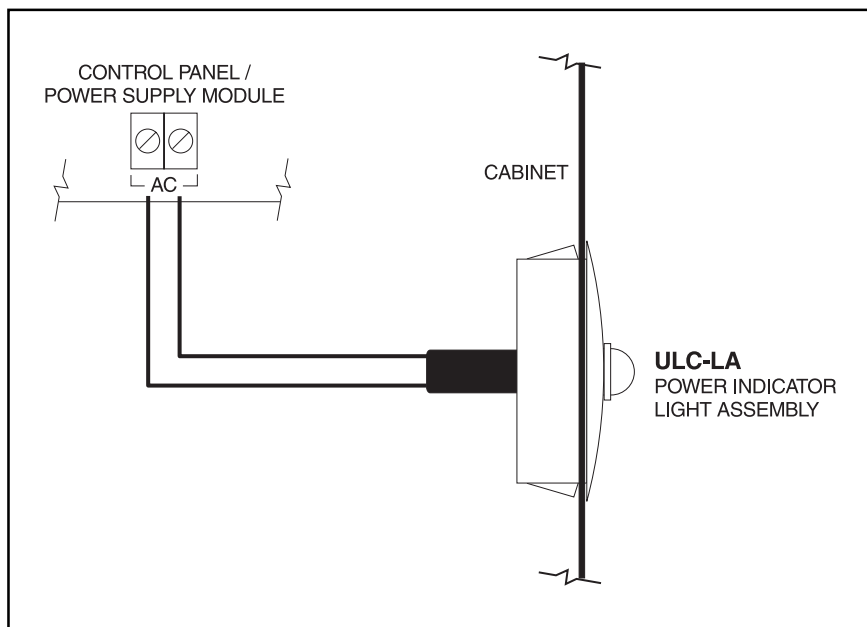

POWER INDICATOR  
LIGHT ASSEMBLY

## INSTALLATION INSTRUCTIONS

The ULC-LA provides a visual indication of AC power being supplied to the control panel for applications where this type of indication is required.

### Installing the ULC-LA

- Remove one knockout from the position on the cabinet where the light assembly will be most visible.
- Run the wires through the knockout hole and press the assembly into the opening.
- Connect the leads as illustrated.

**CAUTION:** Route leads away from batteries, transformer and other wiring to reduce the possibility of shorting.
