## WS4938-2W

For a home security system to be considered comprehensive it needs to protect individuals wherever they may be inside the home – whether they are down in the basement, cooking in the kitchen or watching television. With DSC's wireless WS4938-2W two-button personal panic, users are given a portable means to call for help from anywhere in the home. The WS4938-2W features intuitive activation via a large, clearly defined button that incorporates a full two-second delay to help reduce false alarms. To ensure easy emergency access, the WS4938-2W includes a neck strap and a multifunction clip that can be mounted in a convenient location or worn on a belt.

Product Features:

▶ Activation via two, easy-to-use buttons

▶ Attractive, compact design

▶ Full two-second delay on panic button

▶ Integrated LED to indicate signal transmission

▶ Neck strap included

▶ Reliable 433MHz technology

▶ Multifunction clip included

▶ Water resistant

▶ Long-life lithium batteries included

▶ Supervised

Easy To Use

The WS4938-2W provides users with an uncomplicated, portable means to call for help from anywhere in the home. The unit's two large panic buttons are clearly defined to ensure trouble-free activation in times of emergency.

False Alarm Reduction

The buttons on the WS4938-2W incorporates a full two-second activation delay to help reduce false alarms and to ensure transmissions are sent to the security system only when intended.

Visual Confirmation

A red LED indicator on the WS4938-2W flashes to indicate that a transmission has been sent to the security system.

Value Added

The WS4938 is water resistant and includes a neck strap. Also included is a multifunction clip that allows the personal panic to be permanently mounted to a convenient location or clipped to a belt. The WS4938-2W uses long-life lithium batteries that are installer-activated via a switch located inside the unit, a feature that helps maximize battery life. The WS4938-2W is compatible with all of DSC's current wireless receivers and uses reliable 433MHz wireless technology.

Supervision

The WS4938-2W is a supervised unit that sends periodic transmissions to the receiver to indicate functionality and battery status. If the transmission fails to reach the receiver after a programmed length of time, a trouble is indicated at the control panel keypad.
