Subject: RF5501-433 KEYPAD WITH INTEGRATED 433 MHZ WIRELESS RECEIVER

This is to inform you that DSC is releasing the RF5501-433 keypad with integrated 433 MHz wireless receiver as a replacement for the LCD5501Z32-433. We will begin to ship the RF5501-433 over the next few months as inventory of the LCD5501Z32-433 is depleted.

In addition to being a replacement, the new RF5501-433 offers many enhancements including:

- One dedicated PGM output (not supported on the Power432 control panel)
- One programmable input/output terminal (used as zone or PGM)
- A built-in low temperature sensor (alarm at 6°C or 43°F, restoral at 9°C or 48°F)

The LCD backlighting has been removed, but the overall appearance and all other features remain the same as the LCD5501Z32-433.

The new keypad requires an RF5501-433 v5.0 Driver Pack for the DLS2002 software, which can be downloaded from the password-protected area of the DSC Web site at www.dscsec.com/dls_drivers.htm.

For more information regarding these changes, please refer to the RF5501-433 Installation Manual available on our Web site at www.dsc.com.

Please contact the DSC Customer Help Center at 888-888-7838 or info@dsc.com or contact DSC Technical Support at 800-387-3630 or dsctech@dscltd.com if you have any questions.
