The New DSC Integration Module
IT-100 for residential, commercial & industrial customers

Expo Seguridad Mexico, April 24, 2007– Tyco Fire & Security, a leading provider of intrusion security products worldwide, is introducing a product that interfaces with the latest home and building automation products and audio distribution systems to create seamless, fully integrated control solutions for residential, commercial and industrial customers.

The IT-100 integration module provides an Application Programming Interface (API) to allow third-party home or building automation applications, like Control 4[®], Centralite, AMX and HomeLogic to communicate with DSC PowerSeries control panels. It features a bi-directional RS-232 interface that accepts commands and sends event-driven or state-change commands to third-party applications to create shared functionality.

For more information on the IT-100 integration module, visit www.dsc.com.
