

## PowerSeries Control Panels Featuring new 4.2 Software Makes Installation a Breeze

Packed with features, PowerSeries v4.2 features template programming and independent EOL configuration

**ISC WEST -- Las Vegas, Nevada, Wednesday, April 2, 2008** – The new software release for PowerSeries control panels – v4.2 – makes installation quick and easy. It features template programming for new users and a programming interface that experts will be familiar with. The software also features independent End-of-Line (EOL) configuration that makes installation faster than ever before. Each zone can be independently matched to a device's EOL configuration, reducing the time required to get a common EOL configuration across all devices.

PowerSeries 4.2 software gives the users more control, thereby enhancing the functional experience. The user can Arm Away, Arm Stay or Disarm all partitions with just one operation. And with PowerSeries 4.2 software, there is no need to worry about scalability because the new software doubles the supported wireless zones on the PC1616 – allowing up to 32 wireless zones.

DSC control panels and PowerSeries v4.2 software is a winning combination that has been designed with commercial applications in mind. PowerSeries control panels have a proven reputation for providing the value and **RELIABILITY** that security professionals expect. The modular design provides both **VERSATILITY** and **FLEXIBILITY** in any application. Featuring additional user codes, global arming and disarming, and scheduled auto arming and disarming, DSC control panels, enhanced with PowerSeries v4.2 software, will quickly become a preferred choice for installers.

DSC designs and manufactures exceptional products that work when it matters most.

The PowerSeries Control Panels, featuring v4.2 software, are available in most countries. For more information visit [www.dsc.com](http://www.dsc.com), ISC West booth #23001, or online at [www.dsc.com](http://www.dsc.com).
